

Actero® Elite **Salmonella** Enrichment Media advantages.

FoodChek™’s patented Actero™ Elite Salmonella Enrichment Media is a selective bacterial culture medium specifically optimized for the recovery of *Salmonella* spp. from environmental and food samples in a single-step enrichment. We continue to strive to be the food industry’s single, trusted provider for pathogen and other microorganism testing supplies.

Actero™ Elite Salmonella Enrichment Media is compatible with the BAX® System Real-Time PCR Assay for *Salmonella* and represents the result of true food safety innovation.

Single-step enrichment

As short as **16 HOURS**

Fastest “time-to-results”

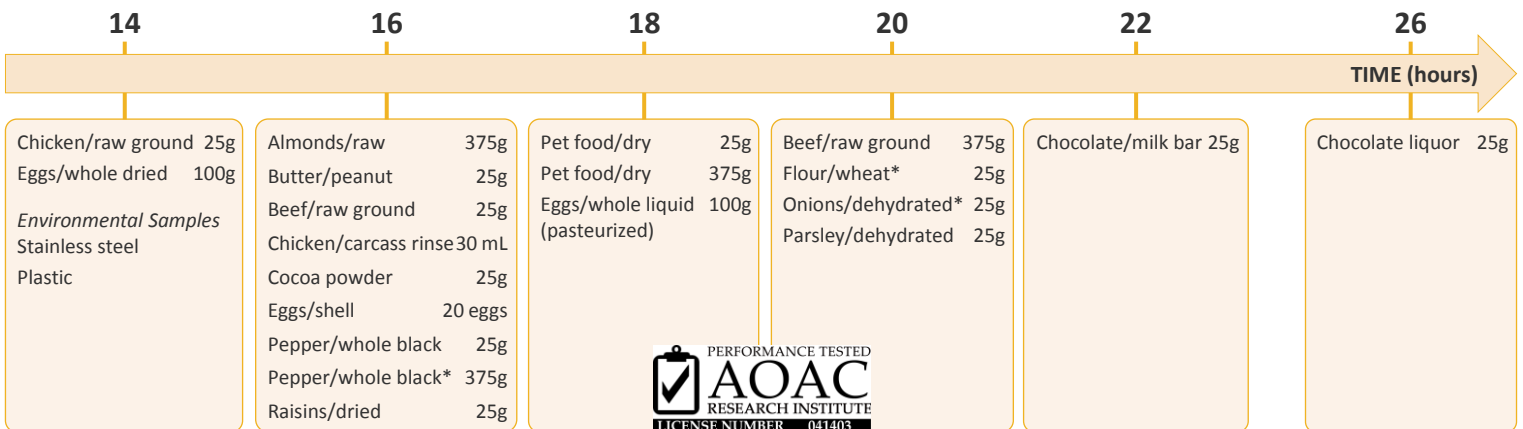

Accurate

-  Reduce sample handling
-  Use less enrichment media*
-  Improve workflow
-  Higher throughput
-  Release food products sooner

* Depending on matrix

Single-Step Enrichment of Environmental and Food Samples with Actero™ Elite Salmonella Enrichment Media

* Internally validated by FoodChek Laboratories Inc.

Actero® Elite **Salmonella** Enrichment Media product list.

Micro-organism	FoodChek Cat. #	HYGIENA Cat. #	Product Name	Format	Description	Availability		
						United States	Canada	Europe
Salmonella	FCM-009	MED2023	ACTERO™ ELITE SALMONELLA ENRICHMENT MEDIA	500G	500g dehydrated media and 3 supplement vials (yields 30L rehydrated media).			
	FCM-047	MED2024	ACTERO™ ELITE SALMONELLA – MEDIABOX™	5L	A selective bacterial culture medium specifically optimized for recovery of <i>Salmonella</i> spp. from environmental and food samples in a single-step enrichment – in liquid format.			
	FCM-048	MED2025	ACTERO™ ELITE SALMONELLA – MEDIABOX™	10L	A selective bacterial culture medium specifically optimized for recovery of <i>Salmonella</i> spp. from environmental and food samples in a single-step enrichment – in liquid format.
