

◆ ThermoTotes

inexpensive variable temperature incubators that plug into your car's cigarette lighter

The ThermoTote family are inexpensive, yet reliable, incubators/transporters that will operate on 12 volts either in your laboratory or alternatively in your automobile by plugging into the cigarette lighter. They take only a few minutes to come up to temperature. They also double as extra incubators for special temperature studies. The 120V AC/DC Converter (Cat. No.7155) allows ThermoTotes to easily plug into a standard power outlet. Call to inquire about customized ThermoTotes.

When power is not available, use **Battery ThermoTote** (size: Small ThermoTote12.) Can be recharged from 12 volt or 120V source (optional converter). Trickle mode allows the battery, once charged, to deliver the maximum power necessary. Included is battery pack and charger. Call to inquire about Batteries for other ThermoTote sizes.

	Small	Medium	Deluxe
TEMP RANGE	25°C to 50°C HEAT only	25°C to 50°C HEAT only	2°C to 65°C HEAT or COOL

- 7145 Small-Size ThermoTote12 Adjustable with LCD Display
- 7148 Small-Size ThermoTote12 Adjustable with LCD Display & Battery
- 7146 Medium-Size ThermoTote24 Adjustable with LCD Display
- 7151 ThermoTote Deluxe Adjustable

ACCESSORIES for use with ALL ThermoTote products unless noted:

- 7155INTL International Converter 220v/240v must specify plug configuration when ordering
- 7155USA Plug 120v (for standard U.S. plugs) Converts 120 volt power to 12 volt DC for non-portable use
- 7160 Cigarette Lighter Adapter (use with only "Deluxe Incubator")
- 7162 Cigarette Lighter Adapter (use with "Small" or "Medium Incubator")
- 7157-12 Wire Petri Dish Racks - 4 racks holds up to 10 plates per rack (use with only "Small Incubator")
- 7157-24 Wire Petri Dish Racks - 4 racks holds up to 10 plates per rack (use with only "Medium Incubator")
- 7152-01 Multiple Plug allows for 3 plugs to function at the same time

◆ Microscope Video Eyepiece

affordable for teaching and e-mail

This inexpensive color digital video camera allows the user to capture the image seen under the microscope with amazing clarity in simple .jpg format. Adapter allows camera to quickly slide into most microscope eyepieces. Line from camera fits into USB port on your computer. Understandable software included which lets you snap a picture and perform simple color correction. Comes with eyepiece, adapter, USB cable and software. Captured images can be up to 640 x 480 pixels. The included software allows you to print full-sized images in various sizes and layouts and create slide shows. With an internet connection you can easily e-mail images.

Software System Requirements: Intel® Pentium® III compatible processors, Microsoft® Windows® 98SE, 2000, Me and XP 32MB of RAM, 18MB of available hard drive space, CD-ROM drive, True Color or HiColor display adapter and monitor; 800x600 display resolution, Windows® compatible pointing device, Microsoft® Internet Explorer 4.0 or higher. Easily download a Macintosh® version from the software manufacturer for a small additional fee.

Microscope Video Eyepiece

Look for CD-Rom's for the computer filled with beautiful images from Mycology on page 6 & Parasitology on page 11. Great for PowerPoint Presentations!

◆ LAB-EL design & print perfectly sized labels

Better identify & organize slides and test tubes with LAB-EL, an inexpensive, simple-to-use program that allows you to design and print on labels that perfectly fit on the end of microscope slides. LAB-EL meets criteria of laboratory inspection by accrediting agencies. The program allows for up to 26 frequently used custom labels that can be saved. Information such as hospital name can be placed in the memory for easy recall. Prints a maximum of 17 letters per line, 5 lines per label. Consecutive numbers can be easily printed. Depending on your printer, choose from white or colored Pin-fed labels or white Laser Printer compatible label. The program is available for IBM PC or other PC compatible machines (at least 128k).

LAB-EL Computer Generated Labeling Program

- 014 LAB-EL Program on CD-ROM
- 005-5 Pin Feed Slide Labels-Color 5,000 labels/case
- 012 Pin-Feed Slide Labels-White 5,000 labels/case
- 018-06 Laser Slide Labels White 6,000 labels/case

◆ Stainless Steel Anaerobic Jar

These unique and inexpensive anaerobic jars are perfect for both the small and large laboratory. These jars seal easily and hold either an anaerobic environment or carbon dioxide. Our sturdy rack fits comfortably into our anaerobic jars and allows the user to withdraw all of the plates at one time. The small jar holds eight plates with our rack or nine plates without. The large jar holds eleven plates with the rack, twelve without. All polished stainless steel jars have clear acrylic lid with clip to view Methylene blue test strip indicator to measure anaerobiosis. Sufficient room is left for the anaerobic envelope and Methylene blue detector system.

Anaerogen™ Fast Anaerobic Atmosphere Generation System

AnaeroGen™ enables oxygen to be safely consumed with no hazardous substances, no hydrogen by-product and no dangerous buildup of pressure in the jar without the help of catalysts or water.

◆ Sterilized Instrument Sets

These instruments are ideally suited for the busy laboratory where sterile instruments are needed at a moments notice. Avoid costly washing and exposure to infectious diseases by simply disposing of them after use. Each sterile instrument pack (cat #903) contains one sturdy stainless steel four inch forceps, one rigid plastic scalpel holder with a #11 blade and one stainless steel pointed scissor. Each package contains 12 individual sterile packs. Scissors and forceps can be re-sterilized by autoclaving.

◆ Disposable Forceps

STERILE FORCEPS (Cat. #904) are exceptionally economical and are available in individually wrapped sterile packets. Forceps are packaged in units of 25. Also available non-sterilized. DISPOSABLE FINE-TIPPED FORCEPS (Cat. #9004) facilitate work with smaller specimens. They are made of stainless steel and coated with an autoclavable plastic. Length is 5.25". Packaged in units of twelve. Also available in sterile wrap, inquire for pricing. DISPOSABLE SLIDE FORCEPS (Cat. #902) have an extra wide tip to hold microscope slides securely while protecting your hands from getting stained. Autoclavable and made of durable plastic, the forceps last as long as comparable metal forceps at a fraction of the price. Packaged in units of 10.

◆ Autoclave Bags

Pre-folded, self-seal pouches are ideal to sterilize forceps or other instruments used around the workplace. Sterility has been shown to be effective for up to one year. No autoclave tape or spore strips are necessary with these bags. They seal neatly and quickly. It is easy to verify proper sterilization. A special indicator strip turns brown/black in steam and gold/green in ETO. Quantity 100 per box.

◆ Mini Grip-Its great for E-tests

The unique design for Mini Grip-It makes quick work of placing coverslips and other small items. This device's suction cup picks up hard-to-handle items such as E-test strips and coverglasses. Tips can be easily chemically sterilized. Comes with an additional replacement suction cup. Sold individually.
